

## NEW PRODUCT – HEYCO EMC METAL LIQUID TIGHT CORD GRIPS

Heyco is happy to introduce its newest product – **Heyco EMC Liquid Tight Cord Grips**.

Heyco EMC Cord Grips offer the following benefits:

- Excellent 360° shield contact with sleeve due to braided shield which runs into the gland.
- Combination of the sealing insert and the contact socket guarantees a constant contact quality with minimal transfer impedance.
- Long thread for use in standard or thick panels.
- Inner cable protection.
- Nickel-plated finish over brass provides excellent corrosion resistance and durability.
- EMC locknuts available. Cutting teeth on locknuts provide optimal shield contact.
- Available in PG and Metric threads.
- Multiple sizes for cable diameters ranging from .10”(2,5mm) to 1.00”(25,5mm)
- IP 68 Rated
- Temperature Range of -40°F (-40°C) to 212°F (100°C)
- Cord Grips are made of Nickel Plated Brass and the gland is made of TPE

The Heyco EMC Cord Grips can be used in the following applications: any application where Electromagnetic Compatibility (EMC) is needed, wind power applications, electronics, electrical junction boxes, generators, telecommunications, aerospace, instrumentation, computer peripherals, and lighting.
