

## THE HEYCO RDD LOCKIT – NOT YOUR FATHER’S STRAIN RELIEF BUSHING

Heyco offers three styles of RDD Lockit Strain Relief Bushings – The Standard RDD Lockit, The Right Angle RDD Lockit and the Pigtail RDD Lockit. All three styles are available for Flat or Round Cables.

The RDD Lockit Strain Reliefs offer the following benefits:

- Independent of insertion into the panel, the RDD Lockits self lock onto the cable. Thus, they may be preassembled off line for final assembly at a later time, or remote location, for lower installed cost.
- RDD Lockits install easily with fingertip pressure into a standard round or Double “D” hole. No clumsy hand tools are required.
- Automated application equipment is available which speeds assembly and lowers costs, while reducing or eliminating repetitive manual assembly motions.
- Multiple panel locking steps secure RDD Lockit Strain Reliefs into a range of panel thicknesses.
- UL Listed – The RDD Lockit Strain Reliefs far exceed UL’s 35lb pullout test.
- RDD Lockit Strain Reliefs are available in black, white and custom colors.

Please see the Strain Relief Bushings section on our website at [www.heyco.com](http://www.heyco.com) where you can also order FREE samples of our RDD Lockit Strain Relief Bushings or any of Heyco’s other products.
