

Introducing the *LLF*— Leg Leveling Foot

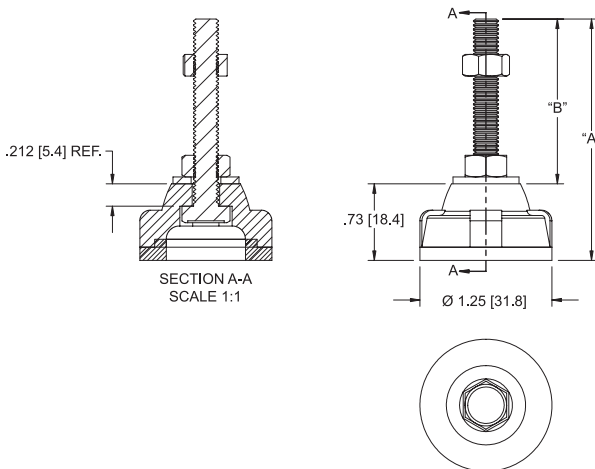

Features and Benefits

- Innovative design allows simple manual leveling by turning the foot under the weight of the appliance
- Maximum load is 56 lbs. (25 kg.)
- Co-molded with two engineered thermoplastic materials that combine the elasticity of Thermoplastic Elastomer (TPE) and the durability and strength of Polypropylene (PP)
- Allows precise leveling of appliances due to uneven floor surfaces
- PP base provides durable contact with the floor and prevents damage to the floor
- TPE foot provides vibration control and isolates structural noise
- 18-8/A2 Stainless Steel Hardware included is RoHS Compliant and meets/exceeds ASTM, DIN, and ANSI/ASME standards (contact Richco for more information)

Markets

- Furniture
- White Goods
- Brown Goods
- Machinery
- Enclosures
