## HEYClip™ SunRunner™ Cable Clip

### Double-Compression Design

HEYClip SunRunner Cable Clips are designed to provide a better method for PV module wire management **and may be used wherever single or multiple cable management is needed.**

- Robust “double-compression” design accommodates from (1) 12 gauge USE-2 to (2) 10 gauge PV-1000 solar wires. Also for use with other cables from .20” (5, 0 mm) to .30” (7,6 mm) in diameter.
- Smooth clip edges prevent damage to cable insulation.
- Locking tabs securely fasten clips to module extrusions **or other panels.**
- Generous lead-in for installation without tools.
- Screwdriver slot for easy removal of clips if necessary.
- Neatly dresses cables on PV panel frames or along mounting channels.
- Fits module frames up to .125” (3,2 mm) thick.
- Constructed from corrosion resistant 304 stainless steel.
