

## HEYCO SOLAR MASTHEAD™ CORDGRIPS JOIN HEYCO'S EXTENSIVE LINE OF HEYCO MULTI-HOLE CORDGRIPS

Heyco is happy to announce that our Heyco Solar Masthead™ brand of Cordgrips are now available in addition to our already extensive line of Heyco Multi-Hole Cordgrips.

Heyco Masthead™ Cordgrips can be used for solar rooftop installations in place of rooftop combiner boxes. They are less expensive, easier to install and more aesthetically pleasing than combiner boxes. The Heyco Masthead™ Cordgrips are threaded into an adapter that allows the Cordgrips to be attached directly to rigid (PVC) or EMT type conduit.

Other benefits/characteristics of the Solar Masthead™ Cordgrips include:

- Provide a watertight seal for PV module output leads to inverters
- NPT threads easily assemble into schedule 40 fittings
- Generous wrenching flats allow for ease of assembly
- No disassembly required for installation
- UV resistant and nylon construction with TPE or Buna N Sealing Gland resists salt water, weak acids, gasoline, alcohol, oil, grease, and common solvents
- 94V-2 flammability rating
- IP 68 rating
- Temperature rating of -22°F(-30°C) to 212°F (100°C)

In addition to the Solar Masthead™ Cordgrips, Heyco offers over 120 Multi-Hole Cordgrips that are available in various sizes and gland configurations with PG, NPT and Metric Hubs. Multi-Hole Cordgrips can be used in numerous applications in addition to solar including Industrial Equipment, Medical Equipment, Motors & Generators, Pumps, Control Panels, Hydraulic Lifts, Scientific & Other Instruments, and Robotics.
