

## Introducing the *SCCA & SCCB* Standoff Cable Clamps

### Features and Benefits

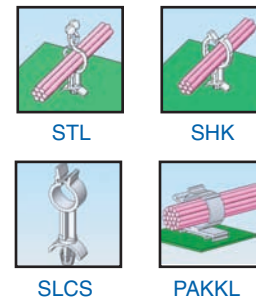

- Press-through cable entry reduces assembly time and working conditions on the assembly line
- Installers are not required to lock or twist the part to lock in the cable
- Design of cable entry provides a smooth entry into the clamp as well as a minor locking feature on the SCCB
- Cupped base provides better coverage of the hole than traditional tension wings
- Cup prevents contaminants moving through the hole and also provides more stability in the panel

### Markets

- White Goods
- Brown Goods / Consumer Electronics
- Office Equipment
- Security Systems
- Telecommunications
